# KEROSENE IN THEIR VEINS

PHILIPP STEINBACH AND SEAN D. TUCKER

# Genuine Pilot's Watches ...

Among the milestones in our more than 80 years of history is the legendary pilot's chronograph from 1941, which we manufacture again as an authentic replica, and the **NATO** chronograph, which is the official wristwatch of the pilots in Germany's Air Force. Tutima also serves as the principal sponsor of the German Aero Club's National Powered Flight Team.

We're all the more pleased that Tutima is closely affiliated with two absolutely exceptional pilots on the international aerobatic scene: Philipp Steinbach and Sean D. Tucker, two men with kerosene in their veins and Tutima's insignia on the wings of the aircraft.

Philipp Steinbach isn't only one of the world's best stunt pilots. He also performs most of his daring flight maneuvers in aircraft that he has constructed himself under the name "Sbach." These include, for example, the two-seater Sbach 342, an ultra-light low-wing carbon-fiber aircraft with technology and styling that reveal a new dimension of flight (see cover photo).

Built by Xtreme in Magdeburg and lacquered in an eye-catching shade of orange, this flying machine helped make Philipp Steinbach the undisputed star of the latest Powered Flight Day in Ulm, where Steinbach enjoyed tumultuous applause from his colleagues when he was ceremonially honored for his outstanding achievements. It was no mere coincidence that the motor-sport committee decided in favor of the 36-year-old member of Baden-Württemberg's

Aeronautical Association. This high-performance pilot has earned top honors in numerous national and international competitions, and was crowned German champion on several occasions.

Ute Delecate from Tutima awarded the prize – a Tutima Grand Classic Automatic – to the happy winner. These weren't the first congratulations that we've offered to Steinbach, whose outstanding performance in a flight show above Schönhagen Airport in Berlin-Brandenburg convinced the jury and earned him the legendary "Tutima Aviation Prize" in the discipline of aerobatics at the "Classic Days" in July 2010.

## A Pilot with Heroic Status

No less impressive are the lifetime achievements of Sean D. Tucker. Having spent more than 20,000 hours in the cockpit, he has long since become a living legend and has acquired

A modern classic for high-altitude flights – the Tutima Grand Classic Automatic: ETA 2836-2 movement. Day/date. Satin-finished stainless steel case. Water resistant to 10 bar. Bidirectionally rotating bezel with red reference marker. Sapphire crystal with antireflective coating, sapphire crystal case back. Leather strap. Diameter: ca. 43 mm (Ref. 628-07).

veritably heroic status among aerobatic fans the world over. After we had collaborated with him and his team of experienced stunt pilots for more than a decade, Tutima and Tucker cofounded the "Tutima Academy of Aviation Safety" early in 2006.

Located close to the coast of California at King City (near Salinas), the flying school offers professional and amateur pilots a unique opportunity to practice their flying skills with the world's best instructors aboard top-quality aircraft and to learn how to respond to critical in-flight situations – a capability optimally harmonizes with Tutima's product philosophy. After all, our brand's name is derived from the Latin word *tutus*, which means "safe" and "protected."

Flying is an inherently risky sport, so a reliable chronograph is an essential item in the equipment of every responsible pilot. The American journalist Ariel Adams recently had a chance to convince himself of this at firsthand. Although Adams doesn't have a pilot's license, the Tutima Academy invited him aboard a test flight over the Pacific Ocean. With a brand-new Tutima Grand Classic strapped to his wrist, Adams took the control stick of an aerobatic biplane in

hand and flew a few rounds on his own. In the wake of this exhilarating experience, Adams became aware of several good reasons why many pilots prefer not to fly without their trusty Tutima wristwatches. "The whole team wears Tutima watches. And I mean they really wear them. These aren't watches that they put on only when they want to put on a show," says Ariel Adams. His report about his experiences can be read here: [www.ablogtoread.com/tutima-watches-secret-flight-school](http://www.ablogtoread.com/tutima-watches-secret-flight-school).

## CLASSICS RELOADED OUR NEW MODELS FOR BASELWORLD

Baselworld, which occurs annually in Switzerland, is the world's leading trade fair for watches and jewelry. Over 100,000 visitors arrived this year to view the newest items from the big brand-name manufacturers and to learn all about the latest trends. For the past 30 years, Tutima has numbered among the regular exhibitors – even though we're not known for continually chasing after the newest trends. But we have good reasons why we remained faithful to the principle of maximal functionality in the three new models that we publically presented for the first time in Basel.

This is especially obvious in our only slightly modified Grand Classic line: because anyone who has created a classic and who wants to continue to successfully evolve it must proceed with the utmost circumspection. At first glance, the **GRAND CLASSIC RESERVE** – which is now equipped with a power-reserve display – appears to be a typical and familiar Tutima classic: patterned after the legendary historical Tutima pilot's chronograph from 1941.

But a second, closer look discovers that the stainless steel case has a new and different shape. The spacious polished areas on the fluted rotatable bezel, together with the characteristic red mark at the "12," stand for timelessly elegant design and optimal legibility. The movement – ETA 2892-A2/Tutima with big date – offers technical refinement and perfect orientation.

The new **GRAND CLASSIC BLACK CHRONOGRAPH PR** is likewise a Tutima watch par excellence. Equipped with a power-reserve display and embodying ultramodern technology, this timepiece is built to cope with the toughest treatment: the stainless steel that's used here is not only deeply hardened via a special process, it's also coated with ultra-hard PVD (Physical Vapor Deposition). This assures that the black surfaces of the case and bracelet are almost entirely invulnerable to blows and scratches. Without a doubt, this chronograph's robustness and clearly instrumental character make it the ideal companion for "turbulent" times. This reliable watch will never leave its owner in the lurch. And when its power reserve begins to decline, a few motions of the wrist are all that's needed: the elaborately revised Swiss self-winding Caliber Valjoux 7750 quickly conveys fresh energy to the barrel.

The stainless steel in the case and bracelet of our new **PACIFIC BLACK** have likewise been annealed and coated with scratch-resistant PVD. Even when facing challenges under extreme conditions, anyone wearing this sportily eye-catching chronograph in timelessly black design needn't devote even a single thought to his or her wristwatch, but can concentrate undivided attention on the demanding tasks at hand. This makes the new Pacific Black another highlight in a series that was designed and built for perfection and precision in water sports. Among its other features, this watch boasts a stainless steel case that's water resistant to 20 bar, a scratch-resistant sapphire crystal and a unidirectional rotating bezel with 60-minute diving scale.

## PRIZEWINNING TRAINER PRIZE FOR BERND SCHRÖDER

With the women's football championship fast approaching, Germany is dreaming about a new "summer fairytale." The chances for a repeat win look quite good because the German world-championship team will have the home-field advantage when it defends its title this summer. The fact that the German women's football team is absolutely top in the international arena is due in no small measure to the athletic prowess of the women who kick the ball in the Federal League.

This was recently reconfirmed at the annual German Olympic Ball in the Glass Hall at the trade fair in Leipzig. The audience at this big charity gala, of which Tutima is the official partner, witnessed the conferral of awards on both the "Athlete of the Year" and on the "Internationally Most Successful Trainer of 2010," who was selected by a high-carat jury at the participating Olympic support site. The clear winner, who has already coached his way to five championship titles, is the most successful trainer of a women's team in the Federal League: Bernd Schröder of the 1st FFC Turbine Potsdam.

On Schröder's behalf, Willi Lausch, the director of the Olympic support site in Brandenburg, accepted the prize: a Tutima Military Aviation Chronograph worth over 3,000 euros. The master trainer and prizewinner was unable to attend the gala reception in person because he was in the midst of preparations for the DFB Cup finals in Cologne, where his team will face the 1st FFC Frankfurt (1:2). The prize conferral was officially repeated soon afterwards in Potsdam, where Axel Lobenstein, who organized the ball, personally conferred the chronograph and the victor's cup on Bernd Schröder.

- 1 **Ultra-hard:**  
The new "GRAND CLASSIC BLACK CHRONOGRAPH PR" has a hardened stainless steel case with PVD coating: modified self-winding Valjoux 7750 movement; 12-hour, 30-minute and 60-second counters, power reserve display, date, water resistant to 10 bar, bidirectionally rotating bezel with red reference marker, domed sapphire crystal, sapphire crystal case back, diameter = 43 mm, (ref. no. 781-41). This chronograph is also available in the red version with stainless steel bracelet (ref. no. 781-44).
- 2 **A new form of functionality:**  
The "GRAND CLASSIC RESERVE" with modified case: automatic self-winding movement ETA 2892-A2/Tutima, power reserve display, big date, central sweep second hand, blued numerals and hands, stainless steel case and bracelet, water resistant to 10 bar, bidirectionally rotating bezel with red reference marker, domed sapphire crystal, sapphire crystal case back diameter = 43 mm, (ref. no. 627-02)
- 3 **A sportily oriented timepiece:**  
The new "PACIFIC BLACK" has a stainless steel bracelet with PVD coating, ETA 2836-2 self-winding movement with day/date, unidirectional rotating bezel with 60-minute diving scale, water resistant to 20 bar, scratch-resistant sapphire crystal, solid stainless steel bracelet, diameter = 43 mm, (ref. no. 677-31)

Tutima starts a new sailing season with strong women and the yacht "Tutima": 46 feet long, with a 23-meter-tall mast and approximately 230 square meters of sail area, the vessel offers ample space for ardent passion and ambitious objectives. Additional information is available at [www.tutima-yacht.de](http://www.tutima-yacht.de)

# TUTIMA MAKES WAVES

The countdown has begun for the biggest event in the world of sport sailing and the biggest summer festival in all of northern Europe: the Kieler Woche begins on June 18, 2011. This traditional event, which raises the pulse rate of every sailor's heart, expects to welcome at least three million visitors from all over the world. Tutima is decisively present – in the truest and most literal sense of the word "decisively."

That's because this year will mark the seventh time that we serve as "Official Timekeeper of the Kieler Woche Regattas." No doubt about it: Tutima and the sport of sailing is a perfect match. More than a few of the approximately 5,000 regatta participants from more than 50 nations wear on their wrists the chronograph that we made with tremendous passion and expressly to satisfy the require-

ments of professional sport sailors. Last but not least, our 14-meter dk46 racing yacht "Tutima" will again cross the starting line in Kiel. On board will be a fifteen-woman crew which has already successfully participated in numerous races (see inset box).

The exciting regattas will take place off the coast of Kiel-Schilksee in sixteen national and international boat classes and in the ten Olympic classes. The instrument wristwatches in our Yachting series are perfectly designed for precisely these requirements. The robust case of pure titanium with built-in push buttons and the characteristic start function clearly show that one doesn't merely wear a Yachting watch: one repeatedly confronts it with new challenges.

Likewise optimally equipped to cope with the extreme conditions of water sports are our automatic Pacific models, which are optionally available with carbon dials. The scratch-resistant sapphire crystal is invulnerable to wind and waves, and the case resists water to 20 bar.

## COVER GIRLS

Especially in the recent past, the fifteen women sailors who comprise the crew of the "Tutima" have repeatedly attracted tremendous attention from the press. For example, "Segel-Journal" featured several of these seaworthy women on the cover of its May/June issue: inside the magazine, which is published by Maximilian-Verlag in Hamburg, an article praised the women's achievements under the headline "The German Women's Crew in the Big-Boat Scene."

Furthermore, the men's magazine "Penthouse" recently ran a five-pages story about the successful women mariners under the headline "When Power Girls Burst the Knot." "Schleswig-Holstein-Magazin" followed suit with its headline: "Fifteen Women Team Up Against the Might of the Oceans." And the editors of the "U.J.S." trade journal for aficionados of watches, jewels and jewelry were likewise smitten with the athletic charms of the crew of the "Tutima": its article about our sponsoring activities in the disciplines of yachting and flying was illustrated with a photo of skipper Kirsten Harmstorf and her team.

### REGATTA SCHEDULE FOR 2011

<b>April 2</b>	<b>GoForSpeed Theorie</b> Hamburg   Germany
<b>April 29–May 1</b>	<b>Maior</b> Kiel   Germany
<b>May 14–15</b>	<b>GoForSpeed</b> Flensburg   Germany
<b>June 3–5</b>	<b>Fünen Rund</b> Kerteminde   Denmark
<b>June 10–12</b>	<b>Big Boat Challenge</b> Kerteminde   Denmark
<b>June 18–25</b>	<b>Kieler Woche</b> Kiel   Germany (IDM Offshore Sailing)
<b>July 6–9</b>	<b>Gotland Rund</b> Sandham   Sweden
<b>July 23–24</b> (1st weekend)	<b>Travemünderwoche</b> Travemünde   Germany
<b>July 30–31</b> (2nd weekend)	<b>Travemünderwoche</b> Travemünde   Germany
<b>Aug. 17–21</b>	<b>BlueRibbonCup</b> Kiel-Kopenhagen-Kiel   Germany
<b>Sept. 7–11</b>	<b>FL Fördewoche</b> Flensburg   Germany (IDM Inshore sailing)
<b>Sept. 17</b>	<b>FL Fördewoche</b> Flensburg   Germany

- 1 The "TUTIMA PACIFIC AUTOMATIC" with carbon dial – for a sportily distinctive appearance: stainless steel case, ETA 2836-2 self-winding movement, unidirectional rotating bezel with 60-minute diving scale, scratch resistant sapphire crystal with antireflective coating, screw-in crown, water resistant to 20 bar, solid stainless steel bracelet, diameter = 43 mm, (ref. no. 677-05)
- 2 For thoroughly successfully maneuvers in regatta sailing: the "TUTIMA YACHTING CHRONOGRAPH" with start function, pure titanium case, rubber strap, water resistant to 20 bar, self-winding movement Lemania 5100 with approx. 45 hours power reserve, diameter = ca. 43 mm, (ref. no. 751-01)

## BACK TO THE ROOTS – HOME AGAIN IN GLASHÜTTE

Tradition and modernity needn't be mutually contradictory. The truth of this statement will be affirmed by everyone who visits us at the place where we began producing highly functional timepieces back in 1927: namely, Glashütte, a Saxon city which – more so than any other city in the nation – is synonymous with the fine art of German watchmaking.

Throughout the decades when the nation was divided into East Germany and West Germany, we preserved the tradition that began in Glashütte and we continued to evolve it at Ganderkesee in Lower Saxony. In 2008, the same year when the German Watch Museum opened its doors in Glashütte, we opened a production facility of our own in our original hometown. Now the time has come to take the next step ...

### TUTIMA'S BON MOT IN THE MAGAZINE OF THE HAVANNA LOUNGE

As a member of the international network of International Associate Clubs (IAC), the Havana Lounge Bremen has cultivated the distinguished culture of a smoker's and business club for nearly a decade. Our managing director Jörg Delecate numbers among the many captains of industry who belong to the club, which is situated in the heart of the time-honored Hanseatic city. When the club invited him to give an interview to be published in the anniversary issue of its magazine, he gladly agreed. In the interview, he revealed that alongside a noble handmade wristwatch, a good handmade cigar ranks among the most beautiful things in life. Capitalizing on the favorable opportunity, he shared one of his favorite bon mots with the Havana Lounge's magazine:

**"OUR PROFESSION IS TIME, BUT OUR WATCHES ARE TIMELESS."**

Title page of the current Havana Lounge magazine

### TUTIMA BOOT 2011

Boat premieres, new trends and spectacular events: when "boot 2011" opened its gates in Düsseldorf at the beginning of the year, some 1,600 exhibitors whet visitors' appetites for the upcoming water-sports season. As an exhibitor in the VIP Blue Motion Lounge in the big yacht hall 6, Tutima too was represented at the world's largest trade fair for yachting and water sports.
